-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 September 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: _____.

DETAILED ACTION

Claim Objections

1. Claims 2-5 and 9-11 are objected to because of the following informalities:

These claims all refer to "the sensor" when a plurality of sensors have been set forth. It is unclear which sensor the Applicant is referring to. Please clarify.

2. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Regarding claim 7, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2859

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 4, 7 and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Harrison.

7. Harrison discloses the invention as claimed where: an instrument package in a drill string that includes accelerometers and rate gyro is shown in FIG 3. The instrument is rotated with the drill string and inclination angle and azimuth angle are determined.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 2, 3, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harrison.

10. Harrison discloses the invention substantially as claimed. However, Harrison does not disclose the sensors to be in the locations as claimed. This is merely an obvious shift in the location of parts disclosed by Harrison and does not render the claimed device patentable since no unexpected results are obtained [see *In re Japikse*, 86 USPQ 70 (CCPA 1950)]. Therefore, it would have been obvious at the time the invention was made for one of ordinary skill in the art to place the sensors in the positions as claimed based on manufacturing or end-user preferences.

11. Claims 5, 6, 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harrison in view of Van Steenwyk (US Pat. No. 4,706,388).

12. Harrison discloses the invention substantially as claimed. However, Harrison does not disclose the integration as claimed. Van Steenwyk teaches to perform integration for the purpose of calculating desired measurements. Therefore, it would have been obvious at the time the invention was made for one of ordinary skill in the art to use integrations as claimed as an alternative means to calculate measurements using the Harrison device.

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
